Hope you are enjoying this summer weather!

Yes, this is me, aren't I gorgeous? Two weeks ago I was at my wet saw (water table saw) for four hours cutting cups.

I need to cover myself head to toe and the parts of me that were sticking out got covered in cup sludge.

I pushed the boundaries of my old wet saw and it died. Some people would learn from that experience, but now I'm pushing the boundaries of my new wet saw by trying to cut glass and larger items - some of which were successful. Surprisingly, only one smashed to smithereens!"

Overall, I was pretty pleased with the day. I only do this once a year for obvious reasons, lots of set-up and cleanup when you use it for so long. But now I have tons of cups for people to use for their projects (see below Picassiette Flower Class)!

Back to the studio, slowly!

I had my first in-studio test class last week with dividers, a shower curtain down the middle of the room, forehead thermometer, and 14 other precautions in place. Just invited a few people who have been with me forever for feedback and thoughts.

The good news is it went well. Given

that, I'm still taking it really slowly. I'm communicating with the Chamber of Commerce and they had some additional things I can add. I'm definitely going slow and steady on this!

In every newsletter I post two items from my Facebook page.

I post many different types of art, woodwork, assemblage, recycled materials, painting, sculpture, gardens, class offerings and more, anything I find amazing.

If you would spread the word to your friends and relatives in the continental US I'd greatly appreciate it, as I'm happy to mail supply kits! A class is a great birthday gift for your crafty friends and family!

In closing, as always, I'm sending a shout out to our essential workers, who fill the shelves everyday at the supermarket, fix our pipes when they break, and care for us when we are sick.

We appreciate you all!
